## Content visualization software for everyone

Brava!®, from Informative Graphics®, offers the widest range of quality view, markup and collaboration products for the desktop and web available anywhere. From a simple, free desktop Reader to a full, enterprise-wide viewing solution, the Brava family has the product for your needs and budget.

### Brava! Enterprise

A scalable, server-based view, markup and collaboration component for enterprise-wide deployment. With no end-user install required, Enterprise lets users view virtually any file type using just their web browser, including CAD, office and image formats, plus PDF and our own Content Sealed Format (CSF). Out-of-the-box integrations to Documentum, Open Text and Microsoft SharePoint are available.

### Brava! Desktop

This ActiveX-based viewer offers native and neutral format viewing on the desktop or online. Available with or without markup, Desktop offers a full range of CAD, office and image format support, including CSF, PDF and TIFF, and includes features like CSF file creation, redaction (block sensitive areas) and markup burn-in.

### Brava! Reader **FREE**

Our smallest (less than 10MB download) and most basic viewer, this ActiveX-based Reader is perfect for viewing the most popular neutral formats on the desktop or online. It supports CSF, PDF and TIFF.

### Brava! SDK

All products can be integrated into your application using our robust APIs (additional fees may apply).

	Brava! Reader	Brava! Desktop	Brava! Enterprise
Free	X		
Desktop / Web (ActiveX)	X	X	
Thin-Client, Server-Based (Browser Only)			X

## Visual Rights™

**CSF with Visual Rights™** CSF is similar to PDF, but it offers additional security and benefits thanks to our Visual Rights™ persistent file security, which includes password protection, redaction (block content), file expiration and the ability to disable printing, markup and other features.

Users can create CSF files from within Brava Desktop and Brava Enterprise or with one of our Net-It® publishing products, including our free Net-It Now utility that converts virtually any Windows-based format to CSF. Because CSF is only readable by our Brava products, the content is safe and cannot be edited or modified in any way.

Learn more about our Net-It products at: [www.net-it.com](http://www.net-it.com)
